La Clínica/Clinic: Guía Para Facilitadores (De Madre A Madre: Prenatal Care Photonovel Series N° 2) (Spanish Edition)

Synopsis

In the De Madre a Madre photonovel series, Lupe and her family and friends tell their stories about being pregnant and having a baby. In the Clinic photonovel, Lupe goes to her first prenatal appointment. Feeling a bit uncertain about what will happen, she talks with her provider about the breast and pelvic exam and what happens when taking a pap smear. The photonovel also contains practical tips for handling common problems during pregnancy, such as nausea, backaches, leg cramps, tired swollen feet. This companion facilitator guide is designed to help you facilitate a group session using the Teach-With-Stories Method and the De Madre a Madre photonovel on going to the clinic for a prenatal visit. The guide includes: the photonovel, suggested stopping points and discussion questions for each segment of the story, detailed instructions to implement the five steps of the Teach-With-Stories Method, and supplemental field-tested activities for more in-depth learning related to the photonovel topic.
