Customer Reviews

This book is used in Ontario at Ontario Colleges for Beginning Medical Transcription. It is critical to have the Audio CD in order to participate in the course. Because it was not bundled with The Student Edition Audio Transcription Exercises on CD to Accompany Hillcrest Medical Center Beginning Medical Transcription 7th Edition, there were 35 students SCRAMBLING with a teacher to get the course going without delay. should work with the publisher to have this CD included with the textbook. The directors at several Ontario Colleges would likely appreciate this as well as they

were called to work with students individually to locate the audio CD for them.

Book came in a great clean matter and was completely fulfilled with what the description had been written about the book.

This is exactly what I needed for class! The book came on time with the cds that I needed to do my class work.

Exactly what I needed for a great price!

This book was wrote in on probably 45% of its pages, cross word puzzles filled in, ect. But i thot about it and figured that it already had the answers for alot of it so maybe that was a good thing.

Do NOT purchase anything for Medical Transcription!! Please!! This is an almost defunct career choice. As a 37+ year veteran in this field, almost every job has been absorbed by the new computer policies of the Obamacare regime. Almost every transcription job has been cut. There are no jobs, so it's not wise to invest in any tools to do this job. Do yourself a favor and don't waste your money on anything related to this field. It is just about impossible to get a job and there are people with YEARS of experience all over the country who are out of work. I know of one facility that went from 40 transcriptions, down to 3, and that is just one facility!!

Excellent price I saved almost 90% of the original price. The book is used but I looks practically new. Very satisfied with the service.
